Dear Charlie:

We are sending to you, Jerry Willman and Stuart Hersh the revised pages for the workplan for additional work to further delineate the NAPL contamination at the Lenz Oil Site. Because the changes requested were relatively minor, we have not reproduced the entire document. The revised workplan pages are based on the drafts provided to you on March 17, April 21, and May 5 and have been revised in accordance with our various discussions. After approval by the State and USEPA, we will re-issue a complete, final revised workplan. As we have noted, the revised workplan is in the form of an addendum to the Lenz Oil Field Sampling Plan. We are prepared to recommend that the Settling Respondents undertake the work described once the agencies have indicated their approval of the workplan. Please advise us, either by phone or in writing, by the close of business on Thursday, June 2, regarding the response of the agencies to this proposal. As before, please feel free to call John Imse or Elsie Milano at ERM (708/940-7200) or me if you have any questions concerning the revised workplan.

We reiterate that this revised workplan is submitted in an attempt to satisfy the desire of the agencies for certain additional data. Because the proposal is being submitted for settlement purposes, it is not admissible evidence. Submission of the proposal is not an admission by the Settling Respondents that the additional information is necessary or required under the RI/FS Workplan or to produce a final FS. We offer the

revised workplan in a spirit of cooperation and in an effort to resolve outstanding issues regarding Site information.

We eagerly await your response to these revisions to the workplan.

Sincerely,

Eugene H. Bernstein
